Cholesterol Balance

HDL
THE HIGHER,
THE BETTER

Less than
40mg/dL
Is a major risk
factor for heart
disease

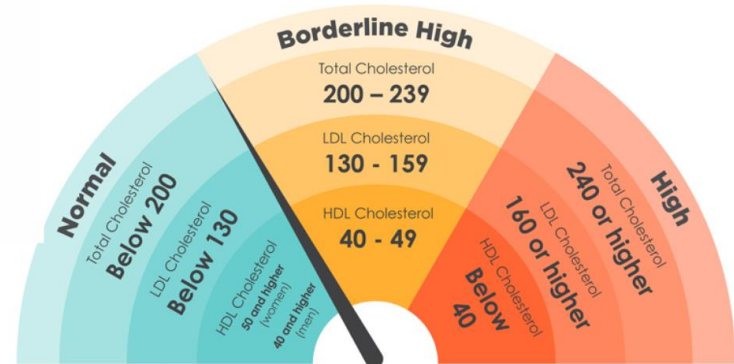

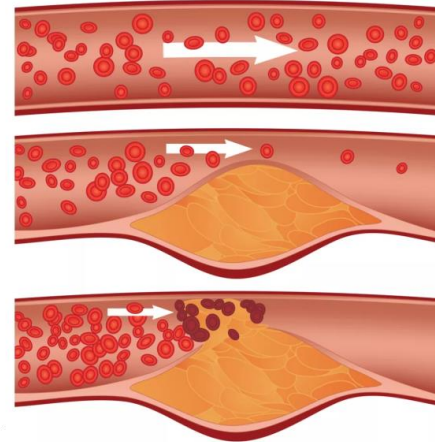

LDL
THE LOWER,
THE BETTER

Optimal: Less
than 100mg/dL
High: - 160-189
mg/dL
Very High: 190
mg/dL and above

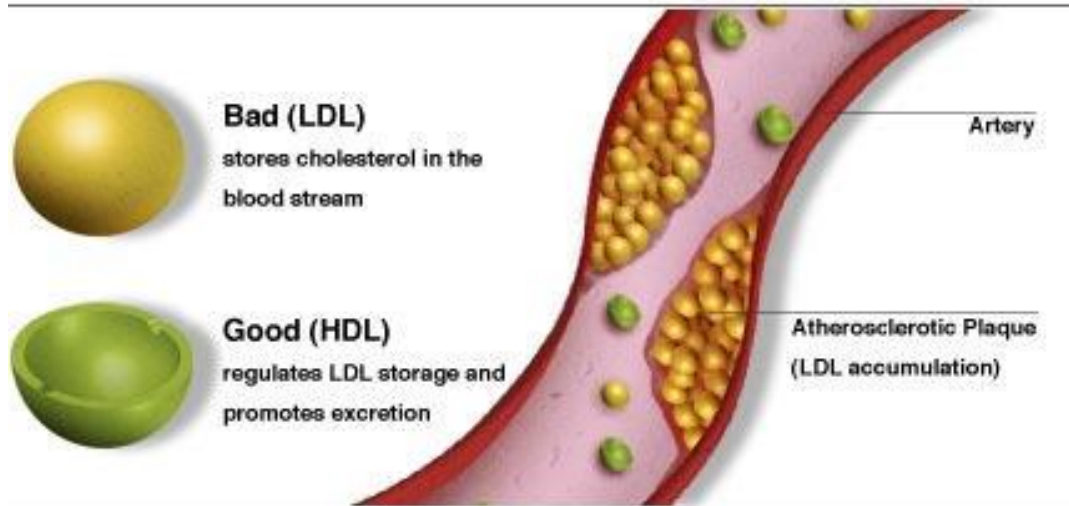

TOTAL CHOLESTEROL :
Best: 200 mg/dL or below
Borderline: 200-239 mg/dL
High : 240 mg/dL or above

Cholesterol Levels

Bad vs. Good Cholesterol

Abnormal levels of lipids (especially cholesterol) can lead to long-term problems, such as atherosclerosis.

Generally, a high total cholesterol level (which includes LDL, HDL, and VLDL cholesterol), particularly a high level of LDL (the "bad") cholesterol, increases the risk of atherosclerosis and thus the risk of heart attack or stroke.

HOW ACTILIFE HELPS

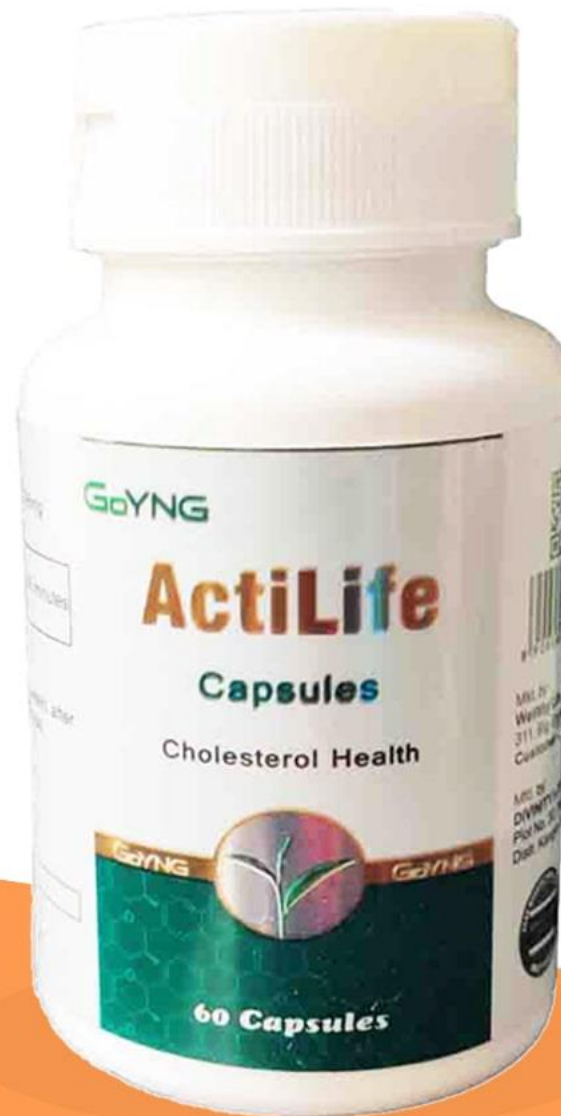

IN HEART HEALTH

FAT BURNING

Catechin,
Thiaflavine
improves
metabolism

SLOW AGING

High Antioxidants
Prevent Cell
Damage

CHOLESTEROL HEALTH

Catechin &
Polyphenols
balances normal
cholesterol

ENERGY BOOSTER

Caffeine Works
on Energy

A close-up photograph of several green, oval-shaped capsules and a pile of green powder on a dark brown wooden surface. The capsules are arranged in a row, with some in the foreground and others in the background. The powder is piled up on the left side of the frame. The background is blurred, showing more capsules and powder.

Contains
Catechins that are natural
antioxidants which help prevent cell
damage and is beneficial for lipid
health. It helps in significant reduction
of LDL-C at any baseline level.

A close-up photograph of several green, oval-shaped capsules and a pile of green powder on a dark brown wooden surface. The capsules are arranged in a row, with some in the foreground and others in the background. The powder is piled up on the left side of the frame. The lighting is soft, creating a warm and natural feel.

Contains
Theaflavins are polyphenol
pigments present that is super effective
for reducing LDL and keeping the lipid
profile in check. Theaflavin is well known
for it's Cholesterol-Lowering Effects.

Antioxidant support

Theaflavins may have antioxidant effects that benefit many parts of the body, especially the skin and hair.

Digestive health support

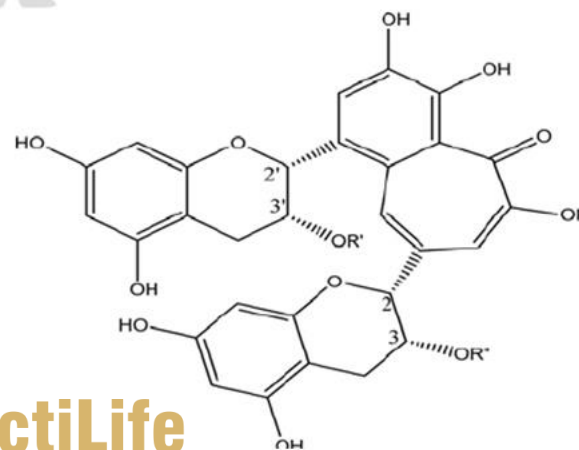

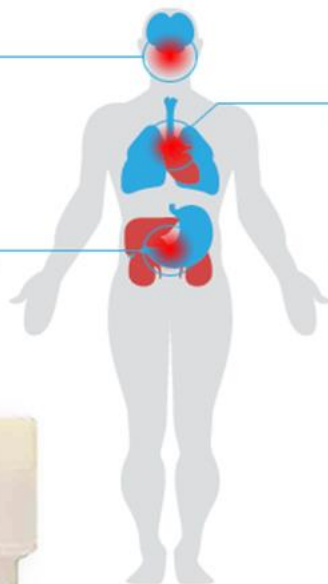

Tea theaflavins may support the digestive system by helping to manage ulcers.

Heart health support

Black tea is often used to maintain healthy heart rhythms. It may also help to relax blood vessels, especially arteries.

Cholesterol profile management

Tea theaflavins may help to maintain a healthy cholesterol profile through two different mechanisms. These mechanisms involved inhibiting the synthesis of cholesterol in the liver and intestinal absorption of cholesterol.
